InstantHMI 5.1 Builds your HMI Application Lightning Fast

Design your HMI/SCADA application the old way, the hard way, the expensive way OR the InstantHMI way. With its **New Project Wizard** in InstantHMI 5.1, your HMI application (Windows PC/CE/Mobile/SmartPhone) practically designs itself. Go from Installation to Communication with controllers (serial, Ethernet, wireless, TCP/IP, OPC, EtherNet/IP, ActiveX etc.) in less than 10 minutes.

InstantPanel™ Color Touch Solutions (5.6", 8.0", 10.4", 12.1" and 15" screen sizes) from Software Horizons includes InstantHMI 5.1 Runtime Engine installed in Windows CE.NET or Windows XP embeded platforms for panel-mount machine control applications and as a low-cost replacement for outdated Operator Interface Terminals. InstantPanel™ connectivity features include three serial ports (RS-232/485 configurable), Ethernet port and three USB 2.0 ports which provide a wide variety of communication and extensibility options. With the built-in CompactFlash card slot, USB 2.0 Ports and 44-pin IDE interface, InstantPanel™ offers a multitude of storage options.

Replace your old control panels with cost-effective InstantPanel™ Touch Systems and receive the benefit of next-generation hardware and easy-to-use software with options and features that provide for future expansion. Logo and OEM branding options are available.

Software Horizons also offers several Industrial/Rugged/Intrinsincally safe PDAs for your mobile computing needs. With various model and feature offerings like Barcode/RFID scanning, built-in WiFi/Bluetooth, SD/CF Memory Card Support, Biometric Security, GPS and more, Software Horizons can help you find the right solution to fit your application needs.

Benefit from wireless RF (WiFi, 802.11a/b/g, Bluetooth) or wired (Ethernet TCP/IP, Serial RS232, 485, 422) links using Modbus, OPC or other drivers to connect to your controllers – including Allen-Bradley, AS-i Gateways, Direct Logic / Koyo, GPS (NMEA), GE-Fanuc, Mitsubishi, Modicon, Siemens, Toshiba, Unitronics, and Wago. EtherNet/IP implementation in InstantHMI enables access to AB Logix controller tags without requiring ladder logic change. In addition, access to Legacy Controllers (PLC5e, SLC5/05, MicroLogix etc) is supported.

InstantHMI 5.1 is the HMI/SCADA solution for your target runtime platforms. Access to many powerful features including: Trending, Data Logging, Recipes, Configuration, OI-Widgets™, Customized OEM DLL and/or User DLL are provided. Install it on Windows PC platforms for a traditional single or multi-node Client/Server HMI setup. For a mobile/wireless solution install it directly on a Windows Mobile PDA or use our InstantChip™ technology to run from a CF/SD/Mini-SD/Micro-SD card. For panel-mount machine control applications use our InstantPanel™ bundled with InstantHMI 5.1.

Software Horizons develops and markets low cost Industrial Human Machine Interface (HMI / SCADA) software and total solutions based on Windows PC, Windows CE, Windows Mobile/Pocket PC, and Palm OS Platforms incorporating the latest technology for wireless connectivity to allow 'Anywhere, Anytime' information access in the field and on the factory floor.
